Terms Explanation

| | |
|---------------------------------|---|
| Rated function temperature(Tf): | The temperature at which an electrical or mechanical device operates. According to IEC6091 safety stipulation, thermal fuse must operate at TF +0/-10°C. (DENAN Law regulates the tolerance range ±7°C) |
| Measured function temperature: | The blowing temperature of the fuse measured in the condition that current is below 10mA and its temperature rises at the rate of 0.5-1°C per minute in a silicon oil bath. |
| Holding temperature(Th): | The maximum temperature at which its conduction state would not change when the fuse is loaded with rated current for 168 hours. |
| Maximum temperature(Tm): | The maximum temperature at which the fuse would not reconnect within 10 minutes. |
| Rated current(Ir): | The maximum current the fuse can bear. |
| Rated voltage(Ur): | The maximum working voltage of the fuse. |

Terms Explanation

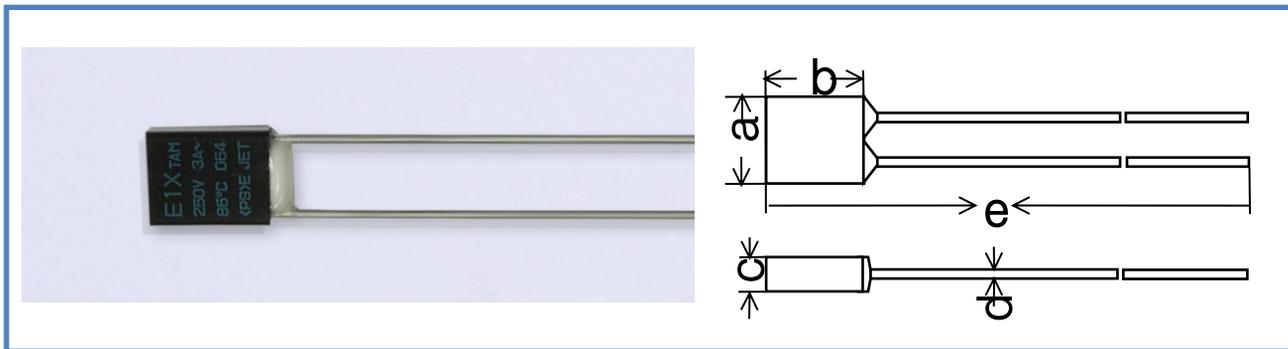

| | |
|---------------------------------|---|
| Rated function temperature(Tf): | The temperature at which an electrical or mechanical device operates. According to IEC6091 safety stipulation, thermal fuse must operate at TF +0/-10℃. (DENAN Law regulates the tolerance range ±7℃) |
| Measured function temperature: | The blowing temperature of the fuse measured in the condition that current is below 10mA and its temperature rises at the rate of 0.5-1℃ per minute in a silicon oil bath. |
| Holding temperature(Th): | The maximum temperature at which its conduction state would not change when the fuse is loaded with rated current for 168 hours. |
| Maximum temperature(Tm): | The maximum temperature at which the fuse would not reconnect within 10 minutes. |
| Rated current(Ir): | The maximum current the fuse can bear. |
| Rated voltage(Ur): | The maximum working voltage of the fuse. |

SM系列 SM 2A 250V Series

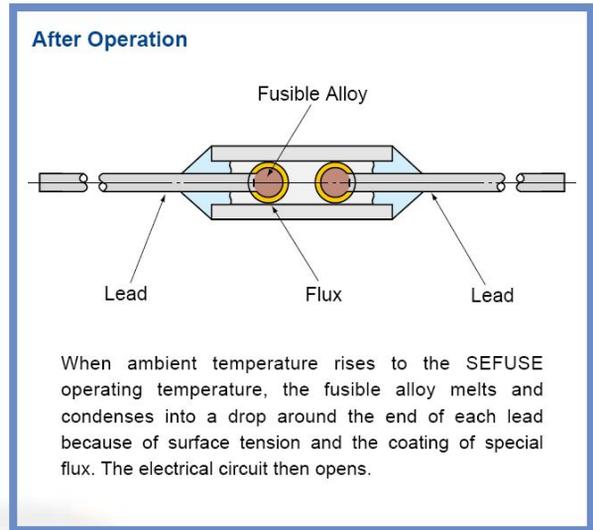

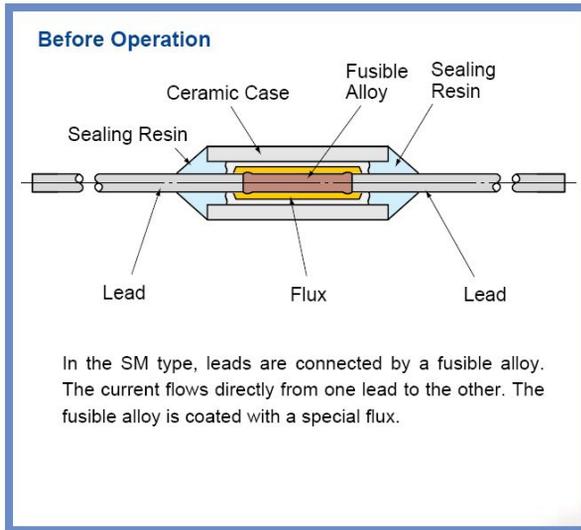

SM/A Series

■ Dimension (Unit:mm)

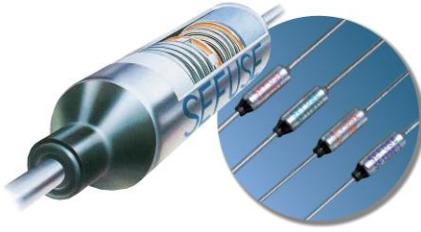

The SM type uses a fusible alloy inside a ceramic case. It has a cutoff(rated) current of 2 A. Because of its insulated case, the SM type can be attached directly where temperature detection is required.

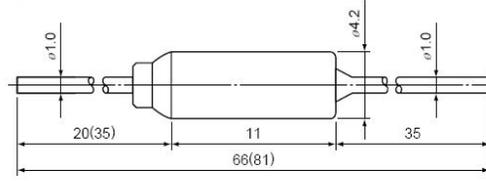

■ Ratings

Note: 1) Part numbers are for standard devices. For long leads, change the last number from 0 to 1.
 2) SM072A has C-UL recognition.
 3) The number in parentheses are previous number. Both number can be inquired.

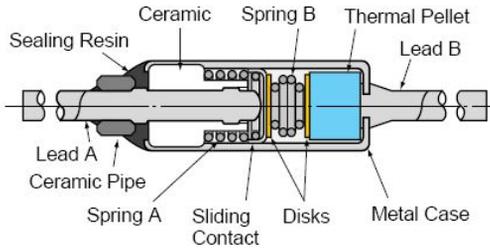

Dimension (Unit:mm)

The SF type uses an organic thermosensitive pellet inside a metal case. It features a large cutoff(rated) current of 10 A or 15 A.

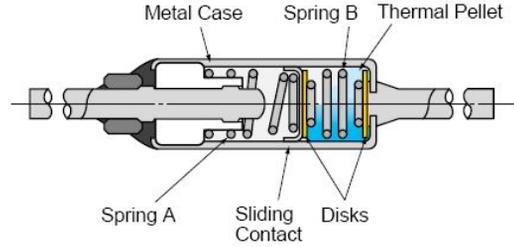

Note: The dimensions for long lead devices are in parentheses.

Before Operation

The SF type contains a sliding contact, springs, and a thermal pellet inside a metal case. When spring B is compressed, firm contact between lead A and the sliding contact occurs. At normal temperatures, current flows from lead A to the sliding contact and then through the metal case to lead B.

After Operation

When the ambient temperature rises to the SEFUSE operating temperature, the heat transferred through the metal case melts the thermal pellet. When the thermal pellet melts, springs A and B expand, moving the sliding contact away from lead A. The electrical circuit is opened by breaking contact between the sliding contact and lead A.

5) SF169E, SF188E, SF214E, SF226E and SF240E has a recognition of CH rating by UL.

6) The number in parentheses are previous number. Both number can be inquired.

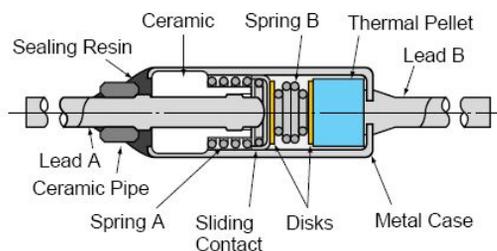

■ Dimension (Unit:mm)

Note: The dimensions for long lead devices are in parentheses.

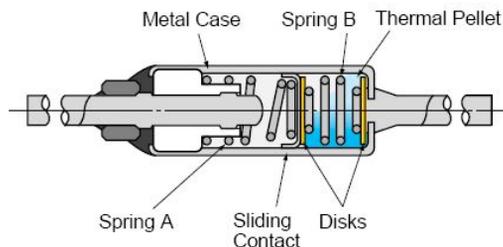

The SF type uses an organic thermosensitive pellet inside a metal case. It features a large cutoff (rated) current of 15 A 250VAC

Before Operation

The SF type contains a sliding contact, springs, and a thermal pellet inside a metal case. When spring B is compressed, firm contact between lead A and the sliding contact occurs. At normal temperatures, current flows from lead A to the sliding contact and then through the metal case to lead B.

After Operation

When the ambient temperature rises to the SEFUSE operating temperature, the heat transferred through the metal case melts the thermal pellet. When the thermal pellet melts, springs A and B expand, moving the sliding contact away from lead A. The electrical circuit is opened by breaking contact between the sliding contact and lead A.

■ Ratings

| Part Number ¹⁾ | Rated Functioning Temperature | Operating Temperature | Rated Current | Rated Voltage | △ | U L |
|---------------------------|-------------------------------|-----------------------|---------------|---------------|--------|--------|
| SF 70Y | 73°C | 70 ± 2 °C | 15A | AC250V | 33-312 | E71747 |
| SF 76Y | 77°C | 76 ± 1 °C | | | | |
| SF 91Y | 94°C | 91 ± 1 °C | | | | |
| SF 96Y | 99°C | 96 ± 2 °C | | | | |
| SF109Y | 113°C | 109 ± 1 °C | | | | |
| SF119Y | 121°C | 119 ± 2 °C | | | | |
| SF129Y | 133°C | 129 ± 2 °C | | | | |
| SF139Y | 142°C | 139 ± 2 °C | | | | |
| SF152Y | 157°C | 152 ± 2 °C | | | | |
| SF169Y | 172°C | 169 ± 1 °C | | | | |
| SF188Y | 192°C | 188 ± 1 °C | | | | |
| SF214Y | 216°C | 214 ± 1 °C | | | | |
| SF226Y | 227°C | 226 ± 1 °C | | | | |
| SF240Y | 240°C | 237 ± 2 °C | | | | |

Note: 1) Part numbers are for standard lead devices. For long leads, add the number "-1" at the end of part number.

- All the parts and materials don't contain lead (Pb).
- Cadmium free contact types are available. Please contact us.
